CONTENTS

No. 1 (February 1982)

MIKLOS, GEORGE L. GABOR and GILL, AMANDA CLARE. Nucleotide sequences of highly repeated DNAs; compilation and comments *page* 1

HAINEY, SHEILA and BISHOP, J. O. Allelic variation at several different genetic loci determines the major urinary protein phenotype of inbred mouse strains 31

MALPICA, J. M. and BRISCOE, D. A. Multilocus nonrandom associations in *Drosophila melanogaster* 41

TAKAHATA, NAOYUKI. Linkage disequilibrium, genetic distance and evolutionary distance under a general model of linked genes or a part of the genome 63

BECHTOL, KATHLEEN B. Lethality of heterozygotes between *t*-haplotype complementation groups of mouse: sex-related effect on lethality of t^6/t^{w5} heterozygotes 79

JOHNSTON, LELAND H. Rapid detection of allelic recombination at the *gall* locus in yeast by assay of the recombinant gene product 85

SHORT PAPERS

AL-DOORI, ZAINAB, WATSON, MARTIN and SCAIFE, JOHN. The orientation of transfer of the plasmid RP4 99

RAO, I. NARAYANA and RAO, M. V. PRABHAKARA. Identification of the chromosomes involved in a wheat-rye translocation using isozyme markers 105

No. 2 (April 1982)

BABIARZ, BRUCE, GARRISI, G. JOHN and BENNETT, DOROTHEA. Genetic analysis of the t^{w73} haplotype of the mouse using deletion mutations: evidence for a parasitic lethal mutation 111

LEBLON, G., HAEDENS, V., KALOGEROPOULOS, A., PAQUETTE, N. and ROSSIGNOL, J.-L. Aberrant segregation patterns and gene mappability in *Ascobolus immersus* 121

RAPHAEL, KATHRYN A., CHAPMAN, R. E., FRITH, PENELOPE A. and PENNYCUIK, PAMELA R. The structure of hair and follicles of mice carrying naked (*N*) gene 139

APPELS, R. and HILLIKER, A. J. The cytogenetic boundaries of the rDNA region within heterochromatin of the *X* chromosome of *Drosophila melanogaster* and their relation to male meiotic pairing sites 149

HILLIKER, ARTHUR J., HOLM, DAVID G. and APPELS, R. The relationship between heterochromatic homology and meiotic segregation of compound second autosomes during spermatogenesis in *Drosophila melanogaster* 157

BARTHELMESS, ILSE B. Mutants affecting amino acid cross-pathway control in *Neurospora crassa* 169

RAO, D. C., MORTON, N. E., LALOUEL, J. M. and LEW, R. Path analysis under generalized assortative mating. II. American I.Q. 187

LAMB, B. C. and HELMI, S. The extent to which gene conversion can change allele frequencies in populations 199

No. 3 (June 1982)

HAMMERBERG, CRAIG. The effects of the *t*-complex upon male reproduction are due to complex interactions between its several regions 219

CHARLESWORTH, B. and SMITH, D. B. A computer model of speciation by effects 227

FALCONER, D. S., ISAACSON, J. H. and GAULD, I. K. Non-random X-chromosome inactivation in the mouse: difference of reaction to imprinting 237

HONEY, N. K., POULTER, R. T. M. and ASTON, P. J. Non-selfing mutants from selfing (Het^-) strains of *Physarum polycephalum* 261

CRICHTON, D. N. and SHIRE, J. G. M. Genetic basis of susceptibility to splenic lipofuscinosis in mice 275

HALL, BARRY G., IMAI, KO and ROMANO, CHARLES P. Genetics of the lac-PTS system of *Klebsiella* 287

CHAKRABORTY, RANAJIT and NEI, MSATOSHI. Genetic differentiation of quantitative characters between populations or species. I. Mutation and random genetic drift 303

LYON, MARY F. and GLENISTER, P. H. A new allele sash (W^{sh}) at the *W*-locus and a spontaneous recessive lethal in mice 315
